

ManagedPAY

Getting Back to Business

"Interstate Security Services is the largest local quality security provider in Las Vegas, with the most effective updated technology. Our security officers are unmatched for accountability, training and appearance. To us, our clients are a big fish in a small pond—not a small fish in a big pond. ManagedPAY shares our standards. They resolved our payroll issues with a time and attendance program targeting specific cost centers, enabling us to control cost and identify profit centers. They ensure our compliance with new regulations and tax laws, providing professional customer service that eases the load on our staff. They always work with us as a team to make it happen.
